SECTIO CHIRURGICA

SUMMER TERM 2015

Headed and presented by Prof. Dr. Bernhard Hirt, Institute of Clinical Anatomy and Cell Analysis:

Datum	Chirurg/in	Disziplin	Thema
Thursday 04/16/15 at 7pm	Prof. Dr. Dr. h.c. Schlensak	Department of Thoracic, Cardiac and Vascular Surgery, University Hospital Tuebingen	Aortic Aneurysm – Hybrid procedure using the frozen elephant trunk
			Season premiere: The acute aortic dissection is life threatening. The mortality rate lies at 2%/h within the first 24h unless it is diagnosed and treated. We will see an exciting procedure and an uncommon surgery using the frozen elephant trunk .
Thursday 04/23/15 at 7pm	Prof. Dr. Königsrainer Prof. Dr. Nadalin	Department of General, Visceral and Transplantation Surgery, University Hospital Tuebingen	Carcinoma of the Pancrea- tic Head - Kausch-Whipple- Surgery
			Within the field of visceral surgery the Whipple-Surgery is one of the most complex and difficult procedures. We will depict the different operational steps in a didactically structured manner using several specimen and animations. Further topics will include preoperative, as well as postoperative, therapy.
Thursday 04/30/15 at 7pm	PD Dr. Zdichavsky	Department of General, Visceral and Transplantation Surgery, University Hospital Tuebingen	Hiatal Hernia- Laparoscopic fundoplication
			Fundoplication guarantees permanent healing of the gastroesophageal reflux disease for over 90% of patients. In this episode of Sectio chirurgica we will show you the impressive laparoscopic fundoplication and gain insight into the medical technology setting.
Thursday 05/07/15 at 7pm	Prof. Dr. Stöckle PD Dr. Ateschrang	Department of Traumatology and Reconstructive Surgery, BG Trauma Center Tuebingen	Arthroscopic Cruciate Ligament Reconstruction
			According to statistics two players in every football game get injured. One of the most common injuries is the cruciate ligament disruption. Rarely is it only the cruciate ligament that gets injured, but also the medial collateral ligament, as well as the medial or lateral meniscus; because of this the injury is also called the "Unhappy Triad". We will see an example in the field of sport traumatology.
Thursday 05/21/15 at 7pm	Prof. Dr. Rosenberger PD Dr. Häberle Dr. Reddersen	Department of Anaesthesia and Intensive Care, Tuebingen	ARDS - Acute Respiratory Distress Syndrome
			This will be one of the most elaborately produced episodes of Sectio chirurgica. We will be joined by the team of intensive care/anaesthesia and by the Tübinger Patientensicherheits- und Simulationszentrum – the Centre for Patient Safety and Simulation, Tuebingen. Get ready for a fascinating case study, cardiovascular technology and the use of ECMO (extracorporeal membrane oxygenation), airway management, a tube thoracostomy, intensive care and more.
